The NFC in Pura® NFC stands for natural fibre core. The high-pressure laminate is made of up to 70% natural fibres, which go through an advanced in-house developed manufacturing process. All Pura® NFC products are certified according to PEFC™ standard.

PURA® NFC

Pura® NFC by Trespa clads buildings in enduring elegance – maintaining its beauty and smooth surface in the face of the elements. The premium façade solution is designed to be durable, low maintenance and easily installed.

PURA® NFC BY TRESPAL

Stunning for decades

Pura® NFC can stand out as an architectural element or harmonise with landscapes and other building materials. Its closed surface minimises dirt build-up and makes the sidings easy to clean. It keeps buildings looking good for decades.

High impact and scratch resistance

PURA® NFC
PU22 Slate Ebony

Durable as a diamond

The façade protects what's behind it. But what protects the façade? Pura® NFC uses next-generation Electron Beam Curing (EBC) technology to create a closed and smooth surface. The system is built for rough weather and has a high impact and scratch resistance. The built-in colour stability means Pura® NFC will look good for years without any replacement pieces or sprucing up.

No painting
or varnishing
needed

PURA® NFC
PU02 Classic Oak

No worries about maintenance

It's wonderful to live or work in a beautiful building. It's less wonderful to climb on a ladder to scrub it every month. Pura® NFC's closed surface prevents dirt from building up, making cleaning easy and infrequent. Contaminants like soot, graffiti and permanent markers are easy to remove. Buildings keep their vibrant beauty year after year, without paintbrushes. It's yet another way that buildings with Pura® NFC façades give owners less to worry about.

The closed surface created by Trespa's proprietary Electron Beam Curing (EBC) technology makes it hard for dirt to build up, locking it out and colours in.

Private house, Dartmouth, United Kingdom

PURA® NFC BY TRESPA

Sidings are intended to be outdoors, after all

Whether it's salty sea air, wind, rain, humidity or intense sunlight, Pura® NFC stands up to the weather. Each Pura® NFC sample undergoes many laboratory tests where it's exposed to damaging climate elements, then checked to confirm it's maintained its vibrancy and polish. Imagine a stylish wooden palazzo that remains richly hued in Florida's humid year-round sunshine or a tranquil seaside home without the need for constant repair. The Pura® NFC system is engineered to stay pristine.

Whether it's atop a mountain
or adorning your garden home,
Pura® NFC looks beautiful
anywhere - and everywhere!

FOLLOW MY ADVENTURES!

PURA® NFC
PUL9000 Metropolis Black

Recently, our gardens have become our sanctuaries, our party rooms and our playrooms. Holiday homes, on the other hand, have always been an escape to calm, whether surrounded solely by nature or a park with amenities and activities. Whatever use the buildings are put to, a façade built with Pura® NFC will enhance the beauty of a property.

Pura® NFC is an enduringly beautiful siding with engineered durability and a range of luxurious decors, from textured Siberian larch to the dark velvety texture of Pura® NFC Lumen.

The beauty of Pura® NFC siding is that you can install it and forget it. It stays pristine for decades, so you have no worries about maintenance. Make your holiday home or garden building a source of joy - not chores - for everyone!

Harmonising
with nature

PURA® NFC

A complete solution

Pura® NFC comes with a tailored collection of installation clips, colour-matched profiles and fasteners - everything needed to create an evenly hued façade. Every detail can look exactly as it was designed to. The sidings come prefinished, but if they need to be fitted for a dormer or eaves, the strength of Pura® NFC means installers can saw without splinters or shattering. Also, the edges don't need sealing – the durability and hue go all the way through. Corners stay sharp and flats stay smooth.

Mystic Cedar

PURA® NFC BY TRESPA

Easily installed, never redone

No-fuss installation

Pura® NFC is engineered to be used in a ventilated façade solution that's easily installed. The relatively low weight of the prefinished sidings makes them easy to slide into place and their durability means they can handle a rough build site. The combination of durability and ventilation helps Pura® NFC withstand challenging climates.

1. Pura® NFC siding
2. Pura® NFC clip
3. Colour-matched profile
4. EPDM
5. Subframe
6. Colour-matched fasteners
7. Load-bearing wall
8. Ventilation airflow

The system includes an air cavity in front of the load-bearing wall, allowing an airflow that prevents heat or moisture accumulation.
