# DURABLE, DISTINCT FAÇADES

ATTRACTIVE AND LONG-LASTING FAÇADES ARE ESSENTIAL TO CLIENTS, TENANTS AND BUYERS. WITH TRESPA® METEON® YOUR BUILDING IS GUARANTEED TO STAND OUT TODAY AS WELL AS TOMORROW.

Trespa® Meteon® can be used in countless applications and has proven its worth in real-life projects for over half a century. Whatever your architectural goals and vision, there will be a right solution.

## TRESPA® METEON®:

- WEATHER RESISTANT & COLOUR STABLE
- LOW MAINTENANCE & EASY TO CLEAN
- SOLID & STURDY

CENTRE DE CALCUL, SPAIN.  
BUILT IN 1991, REVISITED IN 2011.

**20**  
YEARS

## HIGH QUALITY, LOW MAINTENANCE

Trespa® Meteon performs exceptionally well outdoors and it stays looking great for many years. Sun and rain have no significant effect on the panel's surface.

Since nobody is keen on maintenance and the related costs and time investment, Trespa® panels have been developed to minimise this. The neatly closed, pore-free, uniform surface practically withstands dirt accumulation, keeping the product smooth and easy to clean. Graffiti can be treated with the right cleaning agents. A practical approach to saving on maintenance.

## INNOVATION IS IN OUR DNA

Trespa has close ties to the global design community, with its own design centres in New York, Barcelona and Santiago de Chile. Our technology centres are constantly innovating and developing new products to open new possibilities for customers.

This approach has allowed us to come up with aesthetic innovations such as the Meteon® Lumen range, which allows architects to play with light reflection, or functional innovations like Solar Reflectance Technology (SRT), which allows the use of darker façade colours in hot climates.

## SERVICE & RELIABILITY

Making your façades attractive and durable is as important to us as it is to you. We strive to support all parties in a building project, helping ensure each application is a lasting success. We can help find the best solutions for specific designs and detailing, we offer on-time panel delivery and provide training.

*All technical information regarding Trespa® Meteon® is clearly presented on [www.trespa.info](http://www.trespa.info).*

## SUSTAINABLE SOLUTIONS

Trespa® Meteon® contains up to 70% natural fibres and is available with PEFC™ or FSC™ certification. Its sustainable character is expressed through long-lasting performance. Trespa® Meteon® is often used in energy renovation projects, providing fresh new looks to buildings with improved energy performance.

# VENTILATED FAÇADES

TRESPA® METEON® PANELS ARE USED IN INNOVATIVE AND FUNCTIONAL VENTILATED FAÇADE SYSTEMS. VENTILATED FAÇADES ARE MORE THAN A DESIGN GESTURE - THEY CAN PROVIDE ENERGY EFFICIENT, LONG-LASTING PROPERTIES AND IMPROVED COMFORT OF THE INDOOR ENVIRONMENT.

### GENERAL

These terms apply to the use of this document and such use automatically means that the other party agrees to these terms. The information provided by Trespa International B.V. ("Trespa") in this document is solely indicative. Trespa is unable to warrant the accuracy and completeness of this information. Trespa may change the information included in this document at any time and without further notice. Trespa's customers and third parties must ascertain that they have the most recent document (for the most recent version, please consult: [www.trespa.com](http://www.trespa.com)). No rights can be derived from the information provided; the use of the information is at the other party's risk and responsibility. Trespa does not warrant that the information in this document is suitable for the purpose for which it is consulted by the other party. This document does not contain any design, structural calculation, estimate or other warranty or representation that customers and third parties may rely on. This document does not guarantee any properties of Trespa products. Colours used in Trespa's communications (including but not limited to printed matter) and in samples of Trespa's products may differ from the colours of the Trespa products to be supplied. Samples are not intended for use in product tests and are not representative of characteristics of the Trespa

products. Trespa's products and samples are produced within the specified colour tolerances and the colours (of production batches) may differ, even if the same colour is used. The viewing angle also influences the colour perception. Metallics panels feature a surface whose colour appears to change based on the direction from which it is viewed. The specified colour stability and colour specifications relate only to the decorative surface of the Trespa products, not to the core material and samples of the Trespa products. Trespa products are delivered ex-works with straight, sawn sides. Customers and third parties must have a professional adviser inform them about (the suitability of) the Trespa products for all desired applications and about applicable laws and regulations. Trespa does not warrant the above. The most recent version of the current delivery programme and the Material Properties Datasheet can be found at [www.trespa.info](http://www.trespa.info). Only the information in the most recent and valid Material Property Datasheet should be used to select and provide advice regarding Trespa products. Trespa reserves the right to change (the specifications for) its products without prior notice.

### LIABILITY

Trespa is not liable (neither contractual nor non-contractual) for any damage arising from or

related to the use of this document, except if and to the extent that such damage is the result of wilful misconduct or gross negligence on the part of Trespa and/or its management. The limitation of liability applies to all parties affiliated with Trespa, including but not limited to its officers, directors, employees, affiliated enterprises, suppliers, distributors, agents, and representatives.
